

UNSUSPECTED DANGERS

That is What We All Suffer the Most From.

AND KNOW THE LEAST ABOUT.

The Surprising Experience of the Wife of One of New York's Best Business Men.

There are men, and women, too, who are suffering with dull and indefinite pains in various parts of the body, who feel unaccountably weary, who are often feverish, have loss of appetite, strange bearing-down sensations, general feelings of melancholy and who do not know the reason.

It is surprising how much these troubles are increasing, and it is marvelous that so few people know what they mean. There is but one cause for all these things and that is—disordered kidneys. All these troubles are the first symptoms of Bright's disease of the kidneys, which, unless promptly checked, is certain to result in serious sickness or death. There is nothing a little understood, yet so dangerous, as this great modern disease. It attacks people in all walks of life, steals upon them unawares, and fixes itself upon the life before its presence is realized.

It is fortunate that medical and chemical science has discovered a remedy for this great modern monster. Any man or woman suffering from the first symptoms of Bright's disease can positively be relieved of these symptoms and restored to perfect health by acting promptly and taking the right remedy in time. There is but one certain cure for all these troubles and that is Warner's Safe Cure. This is not an idle statement, but one which has been tested and proven in the experience of thousands of sufferers in both continents. Testimonials innumerable to this effect could be given. Here is one from the wife of Mr. D. W. Warren, a well-known and prosperous New York merchant, whose place of business is at Nos. 120, 122 and 124 Franklin at Mr. Warren says:

"About eight years ago my wife was troubled with what she thought was rheumatism. The doctor insisted upon it that she had Bright's disease and informed her that she was in such a deplorable condition that it was impossible for medicine to do her any good. My wife had heard of Warner's Safe Cure through some of her lady friends, who call upon her from time to time, with whom she conversed about her illness, and they suggested its use, though she had also read about it herself and had formed a favorable opinion of it. Immediately after the discouraging information imparted to her by her physician she concluded she would use the Cure and accordingly she let her physician go. He was our family doctor and a very reputable man.

At that time my wife was in bed, perfectly helpless. She could not move either hand or foot and had to have an assistant turn her every few moments. After taking the medicine for three months she received very material relief, and she continued on with it for six months longer, when she could turn herself and move about the bed considerably. She still continued the treatment for six months more, having very great faith in the Safe Cure, at the end of which time she could walk. This was about six years ago. She finally recovered her health and is now as well as most people of her age, can walk three or four miles, get in and out of a carriage without assistance, though upwards of seventy years of age. Whenever she feels anything like a return of her old troubles, such as pains in her knees or back, she immediately has recourse to the Safe Cure, which she deems indispensable, and which she firmly believes has been the means of saving her life."
